

Customized accounting solutions to fit your business needs.

Wouldn't it be fantastic if your accounting, sales and customer service departments were on the same page using the same database?

Sage Extended Enterprise Suite (EES) is the solution.

Do you dream of...

- Your accounting and customer service departments utilizing one streamlined database to create multiple reports and tracking?
- Giving your CEO, CFO, sales directors and operating managers all the information they need to see for themselves how operations are running?
- Making significant strides in sales performance and customer service by tracking communications with customers and prospective customers?
- Cutting costs, building profits and improving your customer service and loyalty?
- Having total visibility to your inventory process from receipt, movement, sale, removal and/or disposition of goods, plus precise inventory status and valuation?

If you have all the dreams above and more, then you need a customized software solution.

Customer Relations Management:

- Eliminate the potential for costly order processing errors.
- Increase efficiency by allowing salespeople to issue sales orders, perform customer inquiries, or view detailed orders and invoices directly without having to contact other staff.
- Easily offer special customer promotions in one click. Not only are those specials easy to implement, they are immediately available to all users.

Sit down with AIS today and learn how EES bundles the core modules of Sage MAS 90 and 200, along with Sage CRM, allowing information to seamlessly flow within your business functions. From your finances to customer relationship management it provides a complete system that delivers end-to-end capabilities.

Create accounting software solutions like EES, when you have a sit-down with our stand-up people, face-to-face.
